DETAILED ACTION

Election/Restrictions

1. Claims 2,3 and 5-8 are withdrawn from further consideration pursuant to 37 CFR 1.142(b) as being drawn to a nonelected invention, there being no allowable generic or linking claim. Election was made **without** traverse in the reply filed on December 2, 2005.

Claim Rejections - 35 USC § 102

2. The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(b) the invention was patented or described in a printed publication in this or a foreign country or in public use or on sale in this country, more than one year prior to the date of application for patent in the United States.

3. Claims 1,4 and 9-11 rejected under 35 U.S.C. 102(b) as being anticipated by Schoelling US 2002/0151859. With regards to claims 1, in Paragraph 0009 Schoelling discloses a tampon made of compressed fibrous material with an insertion end, a recovery end, a longitudinal, and an outer surface with longitudinal ribs and it is shown in Figure 1, that the surface ribs (raised portions) in the comprise a width y (smaller width) closes to tip of the tampon, and a width x (greater than y) as the width of the ribs increases in the insertion end. With regards to claims 4, the surfaces, grooves or ribs taught by Schoelling are in a spirally shaped *pattern*, as shown in Figure 1 and stated in Paragraph 0009. The tampon taught by Schoelling has a highly compressed core (Paragraph 0009) with regards to claim 9. Also, there is a withdrawal member shown in

Art Unit: 3761

Figure 1, 35 as well as a finger indent on the recovery end of the tampon, Paragraph 0040 with regards to claims 10-11.

Double Patenting

4. The nonstatutory double patenting rejection is based on a judicially created doctrine grounded in public policy (a policy reflected in the statute) so as to prevent the unjustified or improper timewise extension of the "right to exclude" granted by a patent and to prevent possible harassment by multiple assignees. See *In re Goodman*, 11 F.3d 1046, 29 USPQ2d 2010 (Fed. Cir. 1993); *In re Longi*, 759 F.2d 887, 225 USPQ 645 (Fed. Cir. 1985); *In re Van Ornum*, 686 F.2d 937, 214 USPQ 761 (CCPA 1982); *In re Vogel*, 422 F.2d 438, 164 USPQ 619 (CCPA 1970); and *In re Thorington*, 418 F.2d 528, 163 USPQ 644 (CCPA 1969).

A timely filed terminal disclaimer in compliance with 37 CFR 1.321(c) may be used to overcome an actual or provisional rejection based on a nonstatutory double patenting ground provided the conflicting application or patent is shown to be commonly owned with this application. See 37 CFR 1.130(b).

Effective January 1, 1994, a registered attorney or agent of record may sign a terminal disclaimer. A terminal disclaimer signed by the assignee must fully comply with 37 CFR 3.73(b).

5. Claims 1,4, and 9-11 are provisionally rejected under the judicially created doctrine of obviousness-type double patenting as being unpatentable over claims 1,4, and 9-11 of copending Application No. 10719785. Although the conflicting claims are not identical, they are not patentably distinct from each other because the raised portion claimed in this application automatically creates a surrounding recessed portion with the dimensions and shape corresponding to that of the raised portion. Claim 1 and the depending claims of claim 1 of both applications are claiming the same invention.

This is a provisional obviousness-type double patenting rejection because the conflicting claims have not in fact been patented.
